

2270lm 2000h

Multipack

Linear halogen lamps have traditionally been used as light sources in various floodlights. They are powerful lamps that withstand high temperatures well. This makes them ideal for applications where strong light is required for extended periods, such as renovation and construction work. The halogen lamps are packaged in durable blister packs that protect the product while keeping it clearly visible. Available in two different models.

Clear linear halogen J118 120W 2900K R7s 2270lm 2000h 9 x 118 mm, 2 pcs in blister packing.
